

Nelson Peña

Senior iOS Developer / Technical Lead

vald3z32@gmail.com | github.com/nelsonPena

nelsonpena.github.io

PROFILE

I build and evolve native iOS applications, with a focus on maintainable architecture, reusable SDKs and reliable delivery. My experience spans fintech, banking and biometric identity, from hands-on engineering to technical leadership.

CORE SKILLS

Native iOS: Swift / SwiftUI / UIKit / Objective-C / Combine / async/await

Architecture: TCA / VIPER / MVVM / Clean Architecture / SOLID / Dependency injection

SDKs & integrations: SDK development / SPM / REST APIs / Firebase / Auth0 / Amplitude / Plaid / Biometrics / KYC

Quality & delivery: Fastlane / CI/CD / XCTest / XCUITest / Instruments / Code review / Technical mentoring

Complementary mobile experience: Kotlin / Android / Flutter / Dart / React Native

PROFESSIONAL EXPERIENCE

Independent contracts and full-time roles are labeled; some engagements overlap.

Shield Inc.

Jun 2025 - Present

iOS Technical Lead | Independent contract

Developing and evolving production iOS features with SwiftUI and TCA, with responsibility across architecture, integrations and release delivery.

- Authentication and session management with Auth0; product analytics with Amplitude and universal links.
- Reusable SPM modules and SDK/API integrations; Fastlane workflows and QA and App Store release support.

Become Digital

Jun 2021 - May 2025

Full Stack Mobile Developer | Independent contract

Built mobile applications and a facial biometric authentication SDK for identity verification and KYC flows on iOS and Android.

- Native SDK development with Swift and Kotlin, integrating facial authentication and liveness detection.
- Third-party integrations including AWS Amplify and Microblink OCR for document capture.

Grupo AOS

Mar 2025 - May 2025

Senior iOS Developer | Independent contract

Refactored dependency injection and dependency distribution in an existing iOS codebase.

- Worked with CocoaPods and custom Podspecs to organize reusable dependencies.

Nelson Peña

PROFESSIONAL EXPERIENCE / CONTINUED

Grupo ASD

Jan 2025 - Mar 2025

Senior iOS Developer | Independent contract

Built SwiftUI and TCA features for identity verification and digital credential flows, helping define the technical architecture.

- Integrated facial and fingerprint biometric SDKs into KYC and digital ID flows.

Stori

Nov 2024 - Jan 2025

Senior iOS Developer | Independent contract

Developed fintech features for growth, analytics and campaigns in a VIPER-based iOS application.

- Universal links, React Native module integrations and Objective-C development.
- Campaign and product measurement using AppsFlyer and Apptimize.

VASS Latam

Apr 2024 - Nov 2024

Senior iOS Developer | Full-time

Developed a US banking application with VIPER and led the team's technical iOS work.

- Integrated Plaid for financial connectivity and bank-account flows.
- Production diagnostics with Firebase Crashlytics and Dynatrace; electronic-signature integrations.

Globant

Jul 2022 - Apr 2024

Semi-Senior iOS Developer | Full-time

Developed modules and redesigned interfaces for a digital wallet, serving as a technical reference within the team.

- VIPER feature development and integration with an interbank transfer platform.

IDEMIA

Oct 2018 - Jul 2022

Mobile Prototyping & Application Developer | Full-time

Developed iOS and Android applications for biometric identity and secure document handling across Latin America.

- Facial-recognition SDK integrations and mobile prototypes for public-sector projects.

EDUCATION

Systems Engineering - Fundación Universitaria del Área Andina

Industrial Design - Universidad Pedagógica y Tecnológica de Colombia

Specialization in Mobile Application Development - SENA

Technologist in Information Systems Analysis and Development - SENA
